Attached image files should have the same aspect ratio as the picture format. Before printing, the image files will be cut to the exact format required.

For image files with less than the required file size or resolution we cannot ensure high quality print results. Images are printed in CMYK color space, images in RGB will be converted to CMYK. Slight colour variations are possible. You may also notice slight variations in colour between what you view on your computer screen and the print result.

The sender of the image file agrees to hold all photo rights. With the signature he/she confirms the accuracy as well as the acknowledgment of the information sheet.
